Sun Protection
The Skin Cancer Foundation recommends Sunbrella fabrics in shading products as an aid in the prevention of sun-induced damage to the skin as a part of a complete sun protection regimen.

Breathable Comfort
Sunbrella shade fabrics are breathable and allow air to pass through them, creating a comfortable space below.

Bleach Cleanable
To easily remove tough stains, simply clean Sunbrella fabrics with a bleach solution. Because the color goes to the core of the fiber, the fabrics will not lose their color.

UV / Fade Resistant
Sunbrella fibers are saturated with highly UV stable pigments. Traditional dyeing methods only add color to the fiber exterior. Sunbrella fabrics' performance characteristics are an integral part of the fabric, not an applied finish that would wash off over time.

Tested Performance

**NOTE: Testing is NOT a rating. Wind and/or rain can damage awning.*

Our awnings are tested for the every day situations that may arise, so you can have peace of mind when purchasing a SunShield awning.
